

SIMPLY SAFE

GCE Safety Campaign 2015

GCE – PROVEN QUALITY FOR BEST SAFETY PERFORMANCE

GCE Group is one of the world's leading producers of equipment for oxygen/fuel cutting and welding processes. Our comprehensive range includes regulators, combination torches, cutters and safety equipment. All of our products have been designed according to the requirements of European and International standards such as ISO, DIN, BSI, AFNOR and Nordic.

GCE Group is a pioneer in the field of safety equipment and currently produces a wide range of high quality safety devices including flashback arrestors and non-return valves.

We know that safety is your first priority, and quality is also essential for performance. The GCE range of products are well established in the market and recognised for their high safety and superior quality standards.

GCE AND SAFETY PROTECTION

Safety is always a primary concern in an oxygen/fuel process and GCE is fully committed to the elimination of all risks in this process.

A flashback is a very severe condition that happens when a back fire ignites the gases. In the worst case the ignited gas travels back through the equipment and into the gas cylinders causing an explosion with potentially fatal consequences.

GCE AND SAFETY SOLUTIONS

The principle behind the GCE Safe Guard safety system is to stop back fires as close to the torch handle as possible, to provide the operator with the best possible protection.

By using GCE safety devices you can eliminate the danger a flash back can cause. GCE Safe Guard products meet all the requirements of the European governing standard EN730-2 and the international standard ISO5175.

GCE SAFETY PROTECTION RECOMMENDATIONS

A GOOD SAFETY SOLUTION

As a minimum safety requirement, GCE recommend that flashback arrestors (GCE Safe-Guard-3) are always fitted to the outlet of the regulator and that safety devices (GCE Safe-Guard-1) are fitted to the inlets of the torch. This applies to both the oxygen and the fuel gas supplies.

THE HIGHEST SAFETY SOLUTIONS

To achieve the highest possible level of protection GCE recommend that a GCE Safe-Guard-5 is fitted to the outlet of the regulator and that a GCE Safe-Guard-2 is fitted to the inlets of the torch. This again applies to both the oxygen and the fuel gas supplies.

THE GCE SAFE GUARD PRODUCT RANGE FOR YOUR PROTECTION AND SAFETY

1 FUNCTION SAFETY DEVICE
GCE SAFE-GUARD-1

NON RETURN VALVE

2 FUNCTION FLASHBACK ARRESTOR
GCE SAFE-GUARD-2

NON RETURN VALVE

FLAME ARRESTOR

3 FUNCTION FLASHBACK ARRESTOR
GCE SAFE-GUARD-3

NON RETURN VALVE

FLAME ARRESTOR

TEMPERATURE SENSITIVE
